

The Facts about the Proposed Landfill: Third in a Series
**Residents Will Benefit From
An Environmental Landfill**

What will a Scotland County Landfill provide?

Revenue - Scotland County would gain substantial revenues from the new landfill in host fees, savings and reduced disposal fees. This is estimated at up to several million dollars per year.

Funded county programs - savings and revenue could help fund much needed services and programs that currently may not be available.

Scotland County needs disposal services. With fuel costs and availability concerns, operating a landfill within Scotland County will bring substantial savings and needed income.

Residents deserve disposal services at a reasonable price with the environmental protections they expect.

Waste Management is offering its expertise to build Scotland County a state-of-the-art modern landfill. The company is a national leader in waste disposal with more than 20 years in North Carolina. In addition to its 283 active landfills properties, Waste Management operates 131 recycling plants, 370 transfer stations, 17 waste-to-energy plants, 94 beneficial-use landfill gas projects, and more than 400 hauling companies throughout the United States and Canada.
